

A PROFESSIONAL PORTFOLIO BY

Muhammad Zhafran Tsany.

SEO Strategist · Multi-Market Organic Growth Architect

Three years of architecting organic search frameworks across Southeast Asia, Australia, and the United States — from category-leading travel platforms to programmatic SEO systems that write, check, and publish themselves.

On building organic growth from the ground up.

LEAD

I'm an SEO specialist with roughly three years of professional experience driving organic growth across Southeast Asia, Australia, and the United States. My work spans the full lifecycle — strategy, keyword research, content optimization, technical SEO, and link acquisition — applied across travel, ERP, agriculture, education, healthcare, fintech, and consumer markets.

Most recently, I led end-to-end SEO across five business units at Adna Group and built programmatic content engines that generate, quality-check, and publish at scale. Before that, I supported multi-market SEO at Traveloka, researching 200+ keywords and optimizing 150+ pieces of content monthly across four countries.

What I do, and how I think about it.

Search Engine Optimization

Keyword research, on-page execution, technical audits, and link strategy — applied across markets with different languages, intent patterns, and SERP behaviors.

Programmatic SEO & Automation

Template-driven page generation at scale, with automated quality gates, widget injection, internal linking, and hands-off publishing straight into the CMS.

Performance Marketing

Google Ads and Meta Ads management with structured testing, audience targeting, and budget allocation. Built tracking infrastructure across Analytics, Tag Manager, and Ads.

Content Strategy & Localization

Translation and proofreading across English, Bahasa Indonesia, Vietnamese, Thai, and Spanish. AI-assisted research workflows for production at scale.

Link Building & KOL Outreach

Cold email outreach at scale (2,000+ targets), guest posting, and PBN coordination — plus creator partnerships across Singapore and South Korea.

Web & Technical Foundations

WordPress development, HTML/CSS, AWS, and cloud architecture. Comfortable bridging marketing strategy with engineering execution.

A timeline of growth and ownership.

- 
- 2025 — 26** ● **SEO Head · Adna Group** — 5 business units · AI · AgTech · E-comm · EdTech
Owned end-to-end SEO strategy across five verticals. Built foundational organic systems from 0 → 1, including programmatic content engines for Gotrade and Tembuni.
 - 2024 — 25** ● **SEO Specialist · Traveloka** — Southeast Asia's leading travel platform
Supported multi-market SEO across Singapore, Australia, Philippines, and Vietnam. 200+ keywords/month researched.
 - 2023 — 24** ● **Digital Marketing Associate · SIMAKARA** — EdTech · University entrance prep
Executed performance campaigns and built data-driven reporting to optimize the student enrollment funnel.
 - 2023** ● **SEO Marketer · DMB.SG** — Singapore-based local SEO agency
Managed SEO across 4 client accounts. Built tracking infrastructure and supported paid acquisition on Meta & Google Ads.
 - 2022 — 23** ● **SEO Specialist Intern · Hashmicro** — Singapore ERP solution provider
Optimized 120+ articles, contributing to 23% quarterly traffic growth and ~1M total visitors. First taste of scale.

Selected Case Studies.

Nine projects across travel, ERP, agriculture, education, healthcare, fintech, F&B, and consumer markets. Each one a distinct problem — different audience, different SERP, different goal.

Gotrade

FINANCIAL TRADING · PROGRAMMATIC SEO · GLOBAL

“Programmatic content only scales when the quality control is programmatic too — every article passes the same gate before it ships.”

THE CHALLENGE

Gotrade competes in financial trading — a YMYL category where Google demands demonstrable expertise and volume alone never ranks. The mandate was to build a content engine that could produce instrument, market, and education pages at scale, while every single output still cleared originality and E-E-A-T standards without a human reading it first.

THE ARCHITECTURE

Tembuni

HEALTHCARE · MATERNITY CARE · INDONESIA

“Keyword to published article with no one in the loop — and 432K impressions in the first month the engine was live.”

THE CHALLENGE

Tembuni is a pro-normal-birth maternity clinic in South Jakarta competing against national health portals for high-volume pregnancy and childbirth queries. The constraint was never keyword difficulty — it was publishing velocity. The clinic had no content team, so the only way to compete was to make the publishing itself automatic.

THE APPROACH

- Built a programmatic keyword map across pregnancy, labour, and postpartum question clusters
- Automated the full drafting pipeline — brief, outline, draft, and on-page elements generated per keyword
- Published straight into the CMS via API, with schema, meta, and internal links applied at write time
- Fed indexing and CTR data back into the queue to prioritise the next publishing batch

OUTCOMES

4K

Clicks in the first month live

432K

Impressions in the first month

100%

Articles written and published hands-off

Traveloka

TRAVEL · SOUTHEAST ASIA

“Scaling localized search across four markets, where every keyword sits at the intersection of language, culture, and travel intent.”

THE CHALLENGE

Traveloka operates Southeast Asia's leading travel platform, with content competing in Singapore, Australia, Vietnam, and the Philippines. Each market has its own language, search behavior, and SERP composition — and content velocity at the platform's scale meant SEO had to scale alongside it.

THE APPROACH

- Conducted keyword research on 200+ keywords monthly across four international markets
- Optimized 150+ pieces of content per month, including travel guides and destination pages
- Ran SERP competitor research and on-page optimization aligned with local intent patterns
- Coordinated with editorial, product, and engineering teams on weekly content planning

OUTCOMES

200+

Keywords researched monthly

150+

Content pieces optimized monthly

04

International markets: SG, AU, VN, PH

HashMicro

ERP • B2B SOFTWARE • SINGAPORE

“A 23% quarterly traffic lift, compounded across a year, became my first lesson in what consistent SEO discipline actually produces.”

THE CHALLENGE

HashMicro is a B2B ERP provider serving complex industries with long sales cycles and technical buyers. The mandate was to grow organic traffic in a content category where intent is high but competition is dense, and where each article needed to function as both an SEO asset and a sales touchpoint.

THE APPROACH

- Optimized 120+ articles for on-page SEO and content quality
- Researched and built ~5 qualified backlinks daily as part of off-page strategy
- Produced content planning aligned with product launches and industry verticals
- Conducted daily technical audits and partnered with UI/UX, frontend, and SEM teams

OUTCOMES

~1M

Total visitors driven via SEO

+23%

Quarterly traffic growth, sustained

10+

Qualified leads per day via SEO content

Superkos

PROPERTY · CONSUMER · INDONESIA

“From a quiet start to a steady curve — a year of compounding visibility in a competitive Indonesian property niche.”

THE STORY

Superkos operates in the Indonesian property and home-design space, where search behavior is dominated by long-tail informational queries with strong local intent. The win came from systematic on-page targeting and content tailored to specific user goals — affordable design references, room layouts, and rental contract templates.

MONTHLY CLICKS · 12-MONTH RAMP

Long-tail keywords ranked #1

Adnafarms

AGRICULTURE · AVOCADO · CALIFORNIA, USA

“A niche US agriculture brand competing on hyperlocal and varietal long-tail — where #1 rankings come from precise intent matching, not volume bets.”

THE CHALLENGE

Adnafarms operates as a California-based avocado grower targeting buyers searching for specific cultivars, growing regions, and farm operations. The opportunity sat in long-tail terms with low difficulty but strong commercial intent — and required a portfolio approach rather than chasing high-volume head terms.

THE APPROACH

- Built and managed a 280+ keyword portfolio focused on long-tail and varietal queries
- Prioritized search intent and SEO difficulty over raw search volume
- Optimized blog and farm-location pages for both informational and commercial intent
- Tracked SERP feature wins (local pack, image pack) alongside rankings

OUTCOMES

280+

Keywords actively managed

760+

Clicks in 6 months

112K

Impressions in 6 months

Brotzeit & Palmoilanalytics

F&B · B2B AGRI-DATA · AGENCY ENGAGEMENT

“Two clients, two very different audiences — the discipline is in adapting the same SEO craft to the SERP at hand.”

BROTZEIT

German cuisine · Singapore

Brotzeit is a German-cuisine chain with a strong local presence in Singapore. The work focused on ranking high-value campaign keywords across food, beer, and seasonal Oktoberfest queries — combining on-page optimization with disciplined off-page link acquisition.

10K Keywords ranked · **50** Backlinks / mo

- Campaign keyword strategy across 3-month cycles
- Guest posting and PBN link building at scale
- Continuous SERP competitor research

PALMOILANALYTICS

Agri-commodity intelligence · Global

A B2B data platform serving palm oil traders, analysts, and commodity buyers. The audience is small but high-intent, so the work emphasized news velocity, technical keyword groups (MPOB, RBD, stearin), and consistent indexing of pricing pages.

10K+ Monthly traffic · **95%** New users

- Ranked across MPOB, palm oil price, and varietal groups
- 2 optimized news articles published weekly
- Forum-based social backlinking

SIMAKARA

EDUCATION TECHNOLOGY • INDONESIA

“When the search query is also the enrollment funnel — every #1 ranking on a registration-related term is a measurable step closer to a student.”

THE CHALLENGE

SIMAKARA prepares Indonesian students for the SIMAK UI university entrance exam — a category where SEO directly feeds the enrollment funnel. The work blended search optimization with broader digital marketing: leads needed to be ranked, captured, and converted, not just clicked.

THE APPROACH

- Identified and ranked high-intent registration-related queries (e.g. “contoh formulir pendaftaran bimbel”)
- Optimized landing pages for both informational and enrollment intent
- Built data-driven reporting systems that connected SEO traffic to enrollment outcomes
- Targeted long-tail queries around exam prep and program selection

OUTCOMES

6.2K

Clicks across the campaign

171K

Total impressions

3.6%

Click-through rate

Content, translation, and localization.

Strong SEO depends on strong content. Across five languages and four clients, I've built workflows that move from keyword research to published, localized assets — using AI-assisted research where it pays off and human craft where it matters.

01

RAPIDSEEDBOX

EN → BAHASA INDONESIA

Article writing and translation for a global proxy/VPN brand, with research conducted via custom-built GPT workflows. Live author profile maintained.

02

JEBSEN & JESSEN

EN → BAHASA, THAI, VIETNAMESE

Proofread and translated product descriptions, meta tags, and landing pages across three Southeast Asian languages for a B2B industrial brand.

03

RANKIA.ID

SPANISH → BAHASA INDONESIA

Aligned a Spanish-language finance brand's content to the Indonesian market. Keyword research, article writing, and full Spanish-to-Indonesian translation.

04

HI-FELLA / HI-BIZ

ARTICLE → LANDING PAGE FUNNEL

Drove traffic from blog articles into two B2B product landing pages — a verified supplier database and a virtual expo networking platform.

The relationship side of growth.

Backlinks come from relationships, and creator partnerships scale only when outreach is structured. I've run both — at volume and with discipline.

OUTREACH AT SCALE

Kadabra Inc.

Cold outreach to Indonesian media outlets for paid guest posting partnerships — at meaningful volume, with measured response rates.

2,000+

Websites outreached in 6 months

~10%

Reply rate on cold email

KOL PARTNERSHIPS

Mozartkoogles

Daily KOL outreach across Singaporean and South Korean creator markets — sourcing partners for affiliated and paid promotional campaigns.

50

KOLs outreached daily
